

UGC AUTOPILOT

Master Build Prompt for Opus 4.8 – Paste as your first message in ClaudeMachine

```
{
  "role": "BUILD EXECUTOR",
  "project": "ugc-autopilot",
  "instruction": "Read this entire object before writing any code. Build the full UGC Autopilot pipeline in the exact sequence defined in build_order. Use the exact system_prompt strings for each agent – do not paraphrase. Follow every schema field exactly. Expose every module as a standalone exported async function. Wire everything together only in src/orchestrator/index.ts.",

  "what_this_builds": "An automated UGC pipeline: scan JoinBrands/Trend.io/Insense/Influee for open paying campaigns -> 5 parallel Claude agents analyse the campaign -> synthesis agent produces a CreativeBrief -> Higgsfield generates a UGC video -> QC + AI-disclosure gate -> distribute -> log payout.",

  "runtime": "TypeScript / Node.js. ts-node for dev. Strict mode. ES2020 target.",

  "env_vars": {
    "ANTHROPIC_API_KEY": "required – Claude API for all agents",
    "HIGGSFIELD_API_KEY": "required – Higgsfield generation",
    "JOINBRANDS_COOKIE": "optional – full Cookie header from authenticated browser session",
