

UGC AUTOPILOT — MASTER BUILD PROMPT v2

Higgsfield Supercomputer MCP Edition — Paste as your first message in ClaudeMachine / Opus 4.8

```
{
  "role": "BUILD EXECUTOR",
  "project": "ugc-autopilot",
  "version": "2.0 — Higgsfield Supercomputer MCP edition",

  "instruction": "Read this entire object before writing any code. Build the full UGC Autopilot pipeline in the exact
sequence defined in build_order. Use the exact system_prompt strings for each agent — do not paraphrase. Follow every
schema field exactly. Expose every module as a standalone exported async function. Wire everything together only in
src/orchestrator/index.ts.",

  "what_this_builds": "An automated UGC pipeline: scan JoinBrands/Trend.io/Insense/Influee for open paying campaigns -> 5
parallel Claude agents analyse the campaign -> synthesis agent produces a CreativeBrief -> Higgsfield Supercomputer
generates a UGC video via MCP tool -> QC + AI-disclosure gate -> distribute -> log payout.",

  "runtime": "TypeScript / Node.js. ts-node for dev. Strict mode. ES2020 target.",

  "higgsfield_integration": {
    "platform": "Higgsfield Supercomputer — https://higgsfield.ai/supercomputer",
    "what_it_is": "Full AI creative team in one interface. Handles UGC videos, unboxing, tutorials, product demos, virtual
try-on, AI influencer creation. Production-ready output.",

    "PRIMARY_MODE — ClaudeMachine via MCP": {
      "how": "Call the Higgsfield MCP tool generate_video directly from src/generator/index.ts",
      "api_key_needed": false,
      "subscription_needed": "YES — Higgsfield credits are consumed per generation even via MCP. Check
https://higgsfield.ai/pricing for current plans.",
      "instruction": "In ClaudeMachine, the Higgsfield MCP server is already connected. The generate_video and
show_marketing_studio tools are available. Call them directly — no REST API, no Bearer token, no HIGGSFIELD_API_KEY env
var required.",
      "mcp_tools_available": [
        "generate_video — primary tool for UGC video generation",
        "generate_image — for static product shots",
        "show_marketing_studio — browse available presets and templates",
        "show_characters — select AI avatars/influencers",
        "personal_clipper_create — short-form clip editing",
        "virality_predictor — score content before posting",
        "job_display — check generation job status",
        "balance — check remaining credits"
      ]
    },

    "FALLBACK_MODE — Standalone Node.js REST API": {
      "how": "Use Higgsfield REST API with Authorization: Bearer HIGGSFIELD_API_KEY",
      "api_key_needed": true,
      "when_to_use": "Only if running ugc-autopilot outside ClaudeMachine as a standalone Node.js process",
      "env_var": "HIGGSFIELD_API_KEY"
    }
  },

  "subscription_guidance": {
    "verified_pricing_june_2026": {
      "pay_as_you_go_top_up": "$5 per 100 credits. Credits expire after 90 days — do not roll over.",
      "cost_per_ugc_video": "Standard model (Kling 3.0): ~6 credits = ~$0.30/video. Premium (Sora 2, Veo 3.1): 40-70 credits =
$2-$3.50/video.",
      "ugc_specific_plans": {
        "UGC Builder": "$9/month — 150 credits",
        "UGC Pro": "$17/month — UNLIMITED generations (best value once pipeline is running)"
      }
    },
    "general_plans": {
      "Starter": "$15/month — 200 credits",
      "Plus": "$39/month — 1,000 credits",
      "Ultra": "$99/month — 3,000 credits + one unlimited video model"
    },
    "free_tier": "Yes — free plan with trial credits at signup. Use this first."
  },

  "recommendation": "START FREE. Use the trial credits to test the full pipeline on 1-2 real campaigns. If the pipeline
works and videos are being accepted by platforms: upgrade to UGC Pro at $17/month — unlimited generations for $17 is the
clearest no-brainer in this stack. At even 5 campaigns/month at $150 payout each = $750 revenue vs $17 cost.",
  "do_not_buy_yet": "Do NOT buy a plan before your pipeline runs one successful campaign end to end. Validate first, spend
second."
```
